Author Index Volume 16 (2000)

(The issue number is given in parentheses)

Abeysinghe, T., Modeling variables of different frequencies (1) 117–119
Adya, M., Corrections to rule-based forecasting: findings from a replication (1) 125–127
Adya, M., J.S. Armstrong, F. Collopy and **M. Kennedy,** An application of rule-based forecasting to a situation lacking domain knowledge (4) 477–484
Andersson, M.K., Do long-memory models have long memory? (1) 121–124
Ariño, M.A. and **P.H. Franses,** Forecasting the levels of vector autoregressive log-transformed time series (1) 111–116
Armstrong, J.S., V.G. Morwitz and **V. Kumar,** Sales forecasts for existing consumer products and services: Do purchase intentions contribute to accuracy? (3) 383–397
Armstrong, J.S., *see* **Adya, M.** (4) 477–484
Assimakopoulos, V. and **K. Nikolopoulos,** The theta model: a decomposition approach to forecasting (4) 521–530

Balkin, S.D. and **J.K. Ord,** Automatic neural network modeling for univariate time series (4) 509–515
Banerji, A. and **P.A. Klein,** Obituary: Father of leading indicators: the legacy of Geoffrey H. Moore (2) 277–282
Barot, B., *see* **Öller, L.-E.** (3) 293–315
Barry, R., *see* **Pace, R.K.** (2) 229–246
Bewley, R., Mr. Henri Theil: An interview with the *International Journal of Forecasting* (1) 1– 16
Black, D.C., P.R. Corrigan and **M.R. Dowd,** New dogs and old tricks: do money and interest rates still provide information content for forecasts of output and prices? (2) 191–205
Bujosa-Brun, M., *see* **García-Ferrer, A.** (2) 207–227

Casals, J., M. Jerez and **S. Sotoca,** Exact smoothing for stationary and non-stationary time series (1) 59– 69
Chen, A.-S., *see* **Leung, M.T.** (2) 173–190
Collopy, F., *see* **Adya, M.** (4) 477–484
Corrigan, P.R., *see* **Black, D.C.** (2) 191–205

Daouk, H., *see* **Leung, M.T.** (2) 173–190
Darbellay, G.A. and **M. Slama,** Forecasting the short-term demand for electricity. Do neural networks stand a better chance? (1) 71– 83
Dowd, M.R., *see* **Black, D.C.** (2) 191–205

Enders, W., *see* **Ludlow, J.** (3) 333–347

Flores, B.E. and **S.L. Pearce,** The use of an expert system in the M3 competition (4) 485–496
Forrest, D. and **R. Simmons,** Forecasting sport: the behaviour and performance of football tipsters (3) 317–331
Franses, P.H., *see* **Ariño, M.A.** (1) 111–116

García-Ferrer, A. and **M. Bujosa-Brun,** Forecasting OECD industrial turning points using unobserved components models with business survey data (2) 207–227
Gilley, O.W., *see* **Pace, R.K.** (2) 229–246
Goodwin, P., Improving the voluntary integration of statistical forecasts and judgment (1) 85– 99
Goodwin, P., Correct or combine? Mechanically integrating judgmental forecasts with statistical methods (2) 261–275
Griggs, K., *see* **O'Connor, M.** (1) 101–109

Herwartz, H., *see* **Klapper, D.** (3) 399–421
Hibon, M., *see* **Ord, K.** (4) 433–436
Hibon, M., *see* **Makridakis, S.** (4) 451–476

Ivanova, D., K. Lahiri and **F. Seitz,** Interest rate spreads as predictors of German inflation and business cycles (1) 39– 58

Jerez, M., *see* **Casals, J.** (1) 59– 69

PII: S0169-2070(00)00083-2

Joutz, F. and **H.O. Stekler,** An evaluation of the predictions of the Federal Reserve (1) 17– 38

Kennedy, M., *see* **Adya, M.** (4) 477–484
Klapper, D. and **H. Herwartz,** Forecasting market share using predicted values of competitive behavior: further empirical results (3) 399–421
Klein, P.A., *see* **Banerji, A.** (2) 277–282
Kumar, V., *see* **Armstrong, J.S.** (3) 383–397

Lahiri, K., *see* **Ivanova, D.** (1) 39– 58
Lawrence, M., Editorial: What does it take to achieve adoption in sales forecasting? (2) 147–148
Lawrence, M. and **M. O'Connor,** Sales forecasting updates: how good are they in practice? (3) 369–382
Leung, M.T., H. Daouk and **A.-S. Chen,** Forecasting stock indices: a comparison of classification and level estimation models (2) 173–190
Ludlow, J. and **W. Enders,** Estimating non-linear ARMA models using Fourier coefficients (3) 333–347

Mady, M.T., Sales forecasting practices of Egyptian public enterprises: survey evidence (3) 359–368
Makridakis, S., *see* **Ord, K.** (4) 433–436
Makridakis, S. and **M. Hibon,** The M3-Competition: results, conclusions and implications (4) 451–476
McCullough, B.D., Is it safe to assume that software is accurate? (3) 349–357
Meade, N., A note on the Robust Trend and ARARMA methodologies used in the M3 Competition (4) 517–519
Mélard, G. and **J.-M. Pasteels,** Automatic ARIMA modeling including interventions, using time series expert software (4) 497–508
Morwitz, V.G., *see* **Armstrong, J.S.** (3) 383–397

Nikolopoulos, K., *see* **Assimakopoulos, V.** (4) 521–530

Öller, L.-E. and **B. Barot,** The accuracy of European growth and inflation forecasts (3) 293–315
Ord, J.K., *see* **Balkin, S.D.** (4) 509–515
Ord, K., M. Hibon and **S. Makridakis,** The M3-Competition (4) 433–436
O'Connor, M., W. Remus and **K. Griggs,** Does updating judgmental forecasts improve forecast accuracy? (1) 101–109
O'Connor, M., *see* **Lawrence, M.** (3) 369–382

Pace, R.K., R. Barry, O.W. Gilley and **C.F. Sirmans,** A method for spatial–temporal forecasting with an application to real estate prices (2) 229–246
Pasteels, J.-M., *see* **Mélard, G.** (4) 497–508
Pearce, S.L., *see* **Flores, B.E.** (4) 485–496
Proietti, T., Comparing seasonal components for structural time series models (2) 247–260

Remus, W., *see* **O'Connor, M.** (1) 101–109

Seitz, F., *see* **Ivanova, D.** (1) 39– 58
Simmons, R., *see* **Forrest, D.** (3) 317–331
Sirmans, C.F., *see* **Pace, R.K.** (2) 229–246
Slama, M., *see* **Darbellay, G.A.** (1) 71– 83
Sotoca, S., *see* **Casals, J.** (1) 59– 69
Stekler, H.O., *see* **Joutz, F.** (1) 17– 38

Tashman, L.J., Out-of-sample tests of forecasting accuracy: an analysis and review (4) 437–450
Thomas, L.C., A survey of credit and behavioural scoring: forecasting financial risk of lending to consumers (2) 149–172
